# FOREWORD

The Ghana Health Service together with its partners and other health agencies is responsible for the provision of health care delivery to the people of Ghana. This involves the planning, implementation, monitoring and performance assessment of health programmes and services. In order to fulfill this role there is the need for accurate, relevant and timely information on the health status and health services in Ghana.

This document, *The Health Sector in Ghana: Facts and Figures, 2007* is an update version of that produced in 2005. It is a handy reference on the performance of the health sector as an information tool for policy makers, health service/programme managers, health partners and stakeholders, researchers and students. The document has proved immensely popular as judged by the high demand for it from various quarters.

The data and information are mainly summaries and population-based indicators. Readers are directed to *The Ghana Health Service Annual Report and Ghana Health Service Annual Statistical Report* for detailed presentation of the performance of the health sector. The Ghana Health Service acknowledges the significant role of other agencies such as the Ghana Statistical Services in the provision of health-related statistics to the general public. Some of such statistics have been quoted in this publication and duly acknowledged.

The Centre for Health Information Management of the Policy, Planning, Monitoring and Evaluation division of the Ghana Health Service is the focal unit responsible for the collection, analysis, reporting and presentation of health service information in the Ghana Health Service.

DR. ELIAS SORY  
DIRECTOR GENERAL  
GHANA HEALTH SERVICE

## List of Acronyms

BMC	Budget Management Centre
CFR	Case Fatality Rate
CHIM	Centre for Health Information Management
CHPS	Community Health Planning and Services
EPI	Expanded Programme on Immunization
GDHS	Ghana Demographic and Health Survey
GHS	Ghana Health Service
GSS	Ghana Statistical Services
HRD	Human Resource Division
NACP	National AIDS Control Programme
NHIS	National Health Insurance Scheme
PHD	Public Health Division
PMR	Proportional Mortality Rate
PPME	Policy Planning Monitoring and Evaluation

## **1.0 INTRODUCTION**

### **1.1 The Policy Thrust For 2007**

The Ghana Health Service (GHS) has been established under Act 525 as an agency of the Ministry of Health to ensure access to health services at the community, subdistrict, district and regional levels. The policies of the Service are therefore drawn from the National Health Policy and the third 5YrPOW (2007-2011) and the third 5yr POW. The new Health Policy focuses on the promotion of healthy lifestyles such as good nutrition, regular exercises, recreation and personal hygiene. This e “new paradigm” places healthy lifestyles within the context of the physical and social environments where people live, school and work emphasising potable water, sanitation, and safe food, housing and roads, as a means to promote good health and prevent diseases and injury.

Other key factors and initiatives that influenced GHS Policy thrust include the Ghana Poverty Reduction Strategy (GPRS II), the Millennium Development Goals, Global Health Partnerships, the African Union (AU) health strategy and the NEPAD health strategy.

Significant progress has been made in areas such as the control of vaccine preventable diseases while indicators relating to TB control, malaria, HIV/AIDS and nutrition have shown positive trends. However the burden of communicable including neglected diseases and non-communicable diseases continue to increase due to unhealthy lifestyle choices. High maternal mortality, still birth rates and infant mortality continue to persist. The rollout of CHPS which is a proven effective strategy to take services to the doorstep of the communities has been extremely slow.

The GHS continues to face many challenges including inadequate coverage of priority interventions, inadequate financing and delays in the disbursement of funds. Despite increasing investment in human resource, poor staff attitude and low productivity continue to persist with resulting poor utilisation of services in health facilities. Overall, there is insufficient monitoring and supervision across all levels of the GHS, contributing to a general lack of commitment and little accountability for performance.

The policy thrust for the next five years (2007-2011) is to “Strengthen Systems for effective and efficient delivery of services to households and communities with a focus to improve maternal and child health outcomes”. This will revolve around scaling up high impact rapid delivery public health interventions and improving the quality of clinical care services. The broad activities are geared towards achievement of the four strategic objectives of the health sector. The key results areas under the strategic objectives are as follows:

#### **Strategic Objective 1: Healthy Lifestyle and Healthy Environment**

- Regenerative Health and Nutrition
- Inter-sectoral advocacy and action
- Food safety

#### **Strategic Objective 2: Healthy Reproductive and Nutrition Services**

- Control of communicable and non-communicable diseases
- Reproductive and Sexual Health
- Child Health
- Nutrition

- Clinical Care
- Rehabilitation

**Strategic Objective 3: General Health System Development**

- Human Resource Development and Management
- Infrastructure Development and management
- Health Information Management
- Equipment Management
- Transport
- Drugs and essential logistics management
- Information and Communication Technology(ICT)

**Strategic Objective 4: Governance, partnerships and Sustainable Financing**

- Leadership
- Collaboration and partnerships
- Monitoring and Evaluation

**These broad priority activities are**

1. Scale up the implementation of HIRD interventions.
2. Ensure continuous surveillance and timely reporting of epidemic prone diseases and establish epidemic preparedness and response mechanisms and ensure effective management and control of epidemics
3. Strengthen quality assurance programmes including strengthening referral systems, instituting and providing 24 hour essential services
4. Strengthen the accounting systems at all levels and improve monitoring and supervision to ensure compliance to available financial rules and regulations.
5. Institutionalise the peer review mechanism and district league performance table and introduce schemes to motivate lower level managers to perform.
6. Introduce systems to improve management and access to health information at the district level.
7. Ensure compliance to planned preventive maintenance plans at all levels
8. Refine and clarify strategies and programmes for promoting gender equity

## 2.0 Demography and Vital Statistics

### 2.1 Population Distribution by Region – 2007

NATIONAL TARGET POPULATION BY REGION - 2007				
	Region	Regional Projection	Target Population less than 1 year and expected pregnancy (4%)	Target Population for WIFA (23.2%)
1	Western	2,399,348	95,974	556,649
2	Central	1,843,403	73,736	431,356
3	Greater Accra	3,927,879	157,115	1,119,446
4	Volta	1,865,730	74,629	434,715
5	Eastern	2,322,029	92,881	536,389
6	Ashanti	4,565,683	182,627	1,059,238
7	Brong Ahafo	2,157,949	86,318	500,644
8	Northern	2,209,100	88,364	486,002
9	Upper East	993,317	39,733	228,463
10	Upper West	648,797	25,952	149,872
	<b>Total</b>	<b>22,933,234</b>	<b>917,329</b>	<b>5,502,774</b>

## APPENDIX 2

### 11.0 REPORTED CAUSES OF ADMISSIONS AND DEATHS – 2006

Data on the causes of hospital admissions and deaths were collected from the regional hospitals and district hospitals in all the ten regions excluding the two teaching hospitals and the private health facilities. The total number of admissions data analyzed was 315,998 cases. This represents 42% of the total number of admissions reported in the year.

#### 11.1 Top Ten Causes of Admission All Ages - National

Rank	Cause of Admission	Proportional Morbidity Rate (%)
1	Malaria	32.9
2	Pregnancy and related complications	6.2
3	Anaemia	5.3
4	Diarrhoeal Diseases	4.2
5	Hypertension	3.1
6	Hernia	2.5
7	Gynaecological conditions	2.3
8	Pneumonia	2.0
9	Typhoid fever	1.9
10	Road traffic injuries	1.6
	All other diseases	37.9
	<b>Total</b>	<b>100.0</b>
